WORK EXPERIENCE

Mobile Developer, Patricia Technologies Limited - *March 2020 - Present*

A member of a 4-man team maintaining and adding new products to the company's mobile app, also porting already existing web components.

- Reduced app size of the Android version by 30%, by using Proguard, compressed images/graphics and created reduced sized APK files for specific CPU architectures.
- Improved customer retention by fixing a "large upload" bug that prevented customers from uploading large files after transactions..
- Reduced the app startup time by 15%, by using React Native's FlatList instead of the listView used.
- Technologies in use: Javascript, React, React Native, Redux, Rest API..

Trainer/Instructor (Javascript, React, React Native) - *September 2019 - January 2020*

A contract with the Ekiti State Government, Nigeria to train civil servants on building websites and mobile apps using Javascript, React and React Native.

- Mentor and train students on creating websites and mobile apps using JavaScript, React, and React Native.
- Delivered and designed training classes/lessons per client's requirements.
- Accomplished score of over 8.35 out of 10 on class evaluations.

PREVIOUS EXPERIENCES
